EDUCATION

Towson University

Bachelor of Science in Business Information Systems, GPA: 3.9

Towson, MD

Expected May 2027

Relevant Coursework: Cybersecurity for AI & ML | Data Organization | Systems Analysis & Design | Software Project Mngt

TECHNICAL SKILLS

Certifications & Awards: CompTIA Security+ | AWS Cloud Technical Essentials | Dean's List x5

Software & Operating Systems: Microsoft Office | Power BI | Excel | Burp Suite | Nmap | Wireshark | Windows | Linux | macOS

Programming Languages: Python | SQL | R | C++ | Java | JavaScript | HTML

RELEVANT EXPERIENCE

Cybersecurity AI/ML Intern | Carnegie Mellon University

May 2026 – Present

Pittsburgh, PA

- Leverage the Llama 3.2 AI model to parse and normalize unstructured security logs into OCSF-compliant JSON files, increasing true-positive anomaly detection by 20%
- Utilize Splunk to ingest pfSense syslogs and develop threshold-based alerts, detecting 3 DoS attacks and identifying 4+ source IPs

AI-Powered Data Extractor Extern | Outamation

Oct 2025 - Dec 2025

Remote

- Built a Python based Retrieval-Augmented Generation (RAG) pipeline to automatically extract requested insights from mortgage documents, reducing manual document review time by ~90%
- Leveraged Agile methodologies, leading presentations to 5 stakeholders to ensure 100% on-time delivery of project milestones

Data Management Intern | Hope For All

Jun 2023 – Aug 2023

Glen Burnie, MD

- Streamlined inventory management by digitizing 500+ assets in Excel, eliminating 5 hours of manual tracking
- Implemented file-level encryption for 500+ sensitive donor records, enhancing data security compliance and preventing potential data breaches

PROJECTS

Customer Behavior Analysis | Pandas, SQLite, Power BI

Mar 2026

- Performed end-to-end analysis of consumer shopping patterns using Python (pandas) to reveal only 26% of repeat customers were subscribers, highlighting opportunities to increase subscription adoption among loyal buyers
- Queried data in SQLite to identify Jewelry as the top revenue driver and uncover opportunities for personalized offers
- Created an interactive Power BI dashboard to visualize customer insights, uncovering seasonal peaks across 3 purchase categories

Open Source AI Chatbot | RAG, LLaMa, GitHub

Dec 2025

- Engineered an AI chatbot in Python using the LLaMA 3 model, implementing OCR for advanced image processing
- Analyzed business use case requirements while prompting chatbot, increasing context-aware response rate by ~30%
- Used Retrieval-Augmented Generation to ground AI responses in verified data, reducing hallucinations by ~45%

Fraud Detection Pipeline | SQL, Python, Alert rules

May 2025

- Integrated SQL anomaly-scoring queries within a Python pipeline to analyze 50,000 transactions, achieving 70% accuracy in flagging fraudulent transactions
- Identified 3 key risk indicators via Tableau dashboards and refactored the pipeline accordingly, boosting detection accuracy by 15%

ACTIVITIES & LEADERSHIP

NSBE Social Media Chair | National Society of Black Engineers

Jan 2026 - Present

- Market networking events, workshops, and career resources to increase student awareness and engagement

Resident Assistant | Towson University

Jan 2026 - Present

- Supervise and support a residential community of 50+ students, promoting safety, inclusion, and academic success

BitBrothers Workshop Lead | Tech Organization @ Towson University

Aug 2025 – Dec 2025

- Lead technical workshops and mentor 20+ students on emerging industry trends and in-demand technical skills
