EDUCATION

Towson University Towson, MD
Bachelor of Science in Business Information Systems, GPA: 3.9 *Expected May 2027*

Relevant Coursework: Data Organization | Organizational Database Mngt | Software Project Mngt | Systems Analysis & Design

TECHNICAL SKILLS

Certifications & Awards: CompTIA Security+ | AWS Cloud Technical Essentials | Dean's List x5
Software & Operating Systems: Microsoft Office | Power BI | Excel | Burp Suite | Nmap | Wireshark | Windows | Linux | macOS
Programming Languages: Python | SQL | R | C++ | Java | JavaScript | HTML

RELEVANT EXPERIENCE

Cybersecurity Intensive Fellowship | Carnegie Mellon University May 2026 – Present
Pittsburgh, PA

- Leverage Wireshark to identify port scanning, brute-force, and anomalous connection patterns, then implement firewall rules with pfSense to enhance network security
- Configure Splunk to ingest pfSense syslogs and develop threshold-based alerts, detecting 3 DoS attacks and identifying 4+ source IPs

AI-Powered Data Extractor | Extern Oct 2025 - Dec 2025
remote

- Built a Python based Retrieval-Augmented Generation (RAG) pipeline to automatically extract requested insights from mortgage documents, reducing manual document review time by ~90%
- Leveraged Agile methodologies, leading presentations to 5 stakeholders to ensure 100% on-time delivery of project milestones

Operations & Security Assistant | Towson University Mar 2025 – Present
Towson, MD

- Resolve 10+ daily online inquiries, streamlining scheduling processes and troubleshooting account issues to improve user experience
- Secure facility entry points by screening 900+ daily visitors and following escalation protocols, preventing 10+ security incidents each shift

Data Management Intern | Hope For All Jun 2023 – Aug 2023
Glen Burnie, MD

- Streamlined inventory management by digitizing 500+ assets in Excel, eliminating 5 hours of manual tracking
- Implemented file-level encryption for 500+ sensitive donor records, enhancing data security compliance and preventing potential data breaches

Volunteer Technician | FICCI Jan 2017 – Dec 2025
Landover, MD

- Optimized AV hardware and software, delivering broadcast improvements to enhance viewing experience for 200+ attendees

PROJECTS

Customer Behavior Analysis | *Pandas, SQLite, Power BI* Mar 2026

- Performed end-to-end analysis of consumer shopping patterns using Python (pandas) to reveal only 26% of repeat customers were subscribers, highlighting opportunities to increase subscription adoption among loyal buyers
- Queried data in SQLite to identify Jewelry as the top revenue driver and uncover opportunities for personalized offers
- Created an interactive Power BI dashboard to visualize customer insights, uncovering seasonal peaks across 3 purchase categories

Open Source AI Chatbot | *RAG, LLaMa, GitHub* Dec 2025

- Engineered an AI chatbot in Python using the LLaMA 3 model, implementing OCR for advanced image processing
- Analyzed business use case requirements while prompting chatbot, increasing context-aware response rate by ~30%
- Used Retrieval-Augmented Generation to ground AI responses in verified data, reducing hallucinations by ~45%

ACTIVITIES & LEADERSHIP

BitBrothers Workshop Lead | *Tech Organization @ Towson University* Feb 2026 - Present

- Lead technical workshops and mentor 20+ students on emerging industry trends and in-demand technical skills

Resident Assistant | *Towson University* Jan 2026 - Present

- Supervise and support a residential community of 50+ students, promoting safety, inclusion, and academic success
