EDUCATION

Towson University — Towson, MD
Bachelor of Science in Business Information Systems, GPA: 3.9 — *Expected May 2027*

Anne Arundel Community College — Arnold, MD
Certificate in Supply Chain Management (Dual Enrolled) — *Sep 2021- May 2023*

TECHNICAL SKILLS

Certifications & Awards: CompTIA Security+ | AWS Cloud Technical Essentials | Dean's List x5
Software & Operating Systems: Microsoft Office | Power BI | Burp Suite | Nmap | Wireshark | Windows | Linux | macOS
Programming Languages: Python | C++ | Java | JavaScript | SQL | R

EXPERIENCE

Operations & Security Assistant | Towson, MD — Mar 2025 – Present
Towson University

- Secure facility entry points by screening 900+ daily visitors and following escalation protocols, preventing 10+ security incidents each shift
- Resolve 10+ daily online inquiries, streamlining scheduling processes and troubleshooting account issues to improve user experience

AI-Powered Data Extractor | Remote — Oct 2025 - Dec 2025
Extern

- Built a Python based Retrieval-Augmented Generation (RAG) pipeline to automatically extract requested insights from mortgage documents, reducing manual document review time by ~90%
- Leveraged Agile methodologies, leading presentations to 5 stakeholders to ensure 100% on-time delivery of project milestones

Data Management Intern | Glen Burnie, MD — Jun 2023 – Aug 2023
Hope For All

- Streamlined inventory management by digitizing 500+ assets in Excel, eliminating 5 hours of manual tracking
- Implemented file-level encryption for 500+ sensitive donor records, enhancing data security compliance and preventing potential data breaches

Volunteer Technician | Landover, MD — Jan 2017 – Dec 2025
Faith in Christ Church International

- Optimized AV hardware and software systems, delivering broadcast quality improvements that enhanced viewing experience for 200+ weekly attendees

PROJECTS

Customer Behavior Analysis | *Pandas, SQLite, Power BI* — Mar 2026

- Performed end-to-end analysis of consumer shopping patterns using Python (pandas) to reveal only 26% of repeat customers were subscribers, highlighting opportunities to increase subscription adoption among loyal buyers
- Queried data in SQLite to identify Jewelry as the top revenue driver and uncover opportunities for personalized offers
- Created an interactive Power BI dashboard to visualize customer insights, uncovering seasonal peaks across 3 product groups

Open Source AI Chatbot | *RAG, LLaMa, GitHub* — Dec 2025

- Engineered an AI chatbot in Python using the LLaMA 3 model, implementing OCR for advanced image processing
- Analyzed business use case requirements while prompting chatbot, increasing context-aware response rate by ~30%
- Used Retrieval-Augmented Generation to ground AI responses in verified data, reducing hallucinations by ~45%

Jr Penetration Tester Lab | *TryHackMe, Burp Suite, Nmap* — Aug 2025

- Utilized Burp Suite to intercept, replay, and fuzz HTTP traffic, discovering 3 high-risk input-validation issues
- Conducted network reconnaissance using Nmap to identify 20+ active hosts, mapping ~80% of the target attack surface for vulnerability assessment
- Authored a comprehensive vulnerability report with OWASP-aligned remediation steps, addressing 3 critical security flaws

ACTIVITIES & LEADERSHIP

BitBrothers Workshop Lead | *Tech Organization @ Towson University* — Feb 2026 - Present

- Lead technical workshops and mentor 20+ students on emerging industry trends and in-demand technical skills

Resident Assistant | *Towson University* — Jan 2026 - Present

- Supervise and support a residential community of 50+ students, promoting safety, inclusion, and academic success
